NEWSROOM PHOTOCARD AUTOMATION

Automating News Photocard Creation for
Faster Social Media Publishing

MONITOR

MODERATE

GENERATE

PUBLISH

PROBLEM STATEMENT

What's quietly slowing down your newsroom's social media output

Designing photocards manually for every news article takes significant time.

Social media managers must constantly monitor the website for new posts.

Manual design introduces inconsistency and human errors.

Delays in creating photocards slow down social media publishing.

Sensitive words in headlines may require manual moderation before posting.

As a result, the publishing workflow becomes slow, repetitive, and inefficient.

THE REAL COST

Illustrative impact for a newsroom publishing ~40 articles/day — figures scale with your volume & costs

8–10 min

Average time to manually design one photocard

~180 hrs/mo

Staff time spent on manual photocard production*

Delayed Posts

Missed real-time engagement during breaking news

Inconsistent

Design errors & off-brand posts from manual work

**Based on ~1200 photocards/month. Actual figures depend on your newsroom's article volume.*

Average Design Time per Photocard

10 minutes

That's valuable staff time your newsroom could redirect toward reporting and audience growth.

OUR SOLUTION

1

Monitor Website

Continuously scans the site for newly published articles.

2

Fetch Article Data

Pulls the headline, image, and metadata from the source.

3

Apply Moderation

Screens headlines and auto replaces restricted words.

4

Generate Photocard

Generates a ready-to-download social media photocard instantly.

5

Publish in Seconds

Managers post within seconds not minutes.

This dramatically improves the speed and efficiency of the newsroom's social media workflow.

KEY FEATURES

Automated Photocard Generation

Website Monitoring

Text Moderation Engine

Multiple Photocard Support

Advertisement Support on Photocard

Audio Notifications

Manual Customization

Live Preview

Colorized Text on Photocard

Progressive Web App (PWA)

Every feature is fully customizable to match your newsroom's brand.

SYSTEM WORKFLOW

THIS SYSTEM FOLLOWS A STRUCTURED ARCHITECTURE, AND THE STEP-BY-STEP WORKFLOW IS:

1 Monitor Website
The system continuously checks the website archive for newly published articles.

2 Fetch Article Data
1. Article title,
2. Article image,
3. Metadata (date and details)

3 Text Moderation
Headline checked by moderation engine; restricted words auto-replaced.

4 Photocard Generation
HTML5 Canvas generates a 1080×1080 photocard with image, title, and branding.

5 User Notification
The user receives a notification indicating that the photocard is ready.

6 Download & Publish
The user downloads the generated photocard and shares it on social media.

EFFICIENCY GAINS

Task	Manual Process	DrutoPost
Time per photocard	8-10 Minutes	Under 10 Seconds
Website monitoring	Manual, Constant Checking	Fully automated, 24/7
Headline moderation	Manual review required	Instant & automatic
Brand consistency	Varies by designer	100% template locked
Monthly production time*	~180 hours	~17 hours (review only)
Publishing speed	Minutes after design	Seconds after fetch

**Based on ~1200 photocards/month (~40 articles/day)*

UP TO 90% FASTER PHOTOCARD GENERATION

From ~10 minutes of manual design to under 10 seconds, automatically

PROJECTED ROI

An illustrative savings model based on average structure of our country — actual figures and numbers may varies

SAMPLE ASSUMPTIONS

- ~40 articles published per day (~1,200/month)
- 8–10 minutes of manual design time per photocard (~180hrs/month working time)
- For on site workers 8hrs per day (~240hrs/month working time)
- Designer average salary 20,000 BDT/month (~2,40,000 annual cost per designer)
- Social media manager average salary 15,000 BDT/month (~1,80,000 annual cost per SMM)
- Total annual cost for pipeline 4,20,000 BDT*

** Numbers may varies depending on your salary structure and work volume. Multiple staff will cost you more.*

163+ hours saved

in staff time every month

30,000 BDT+ / month

in reclaimed staff cost (~3,60,000 BDT+ /year)

90% faster

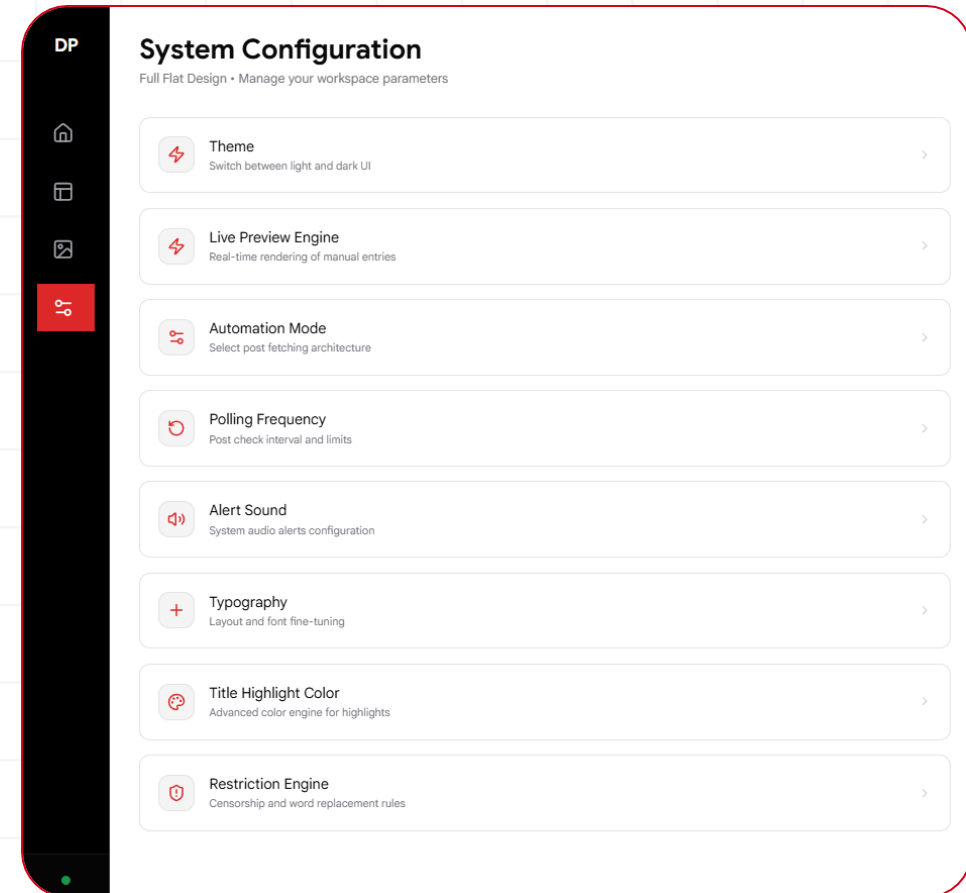

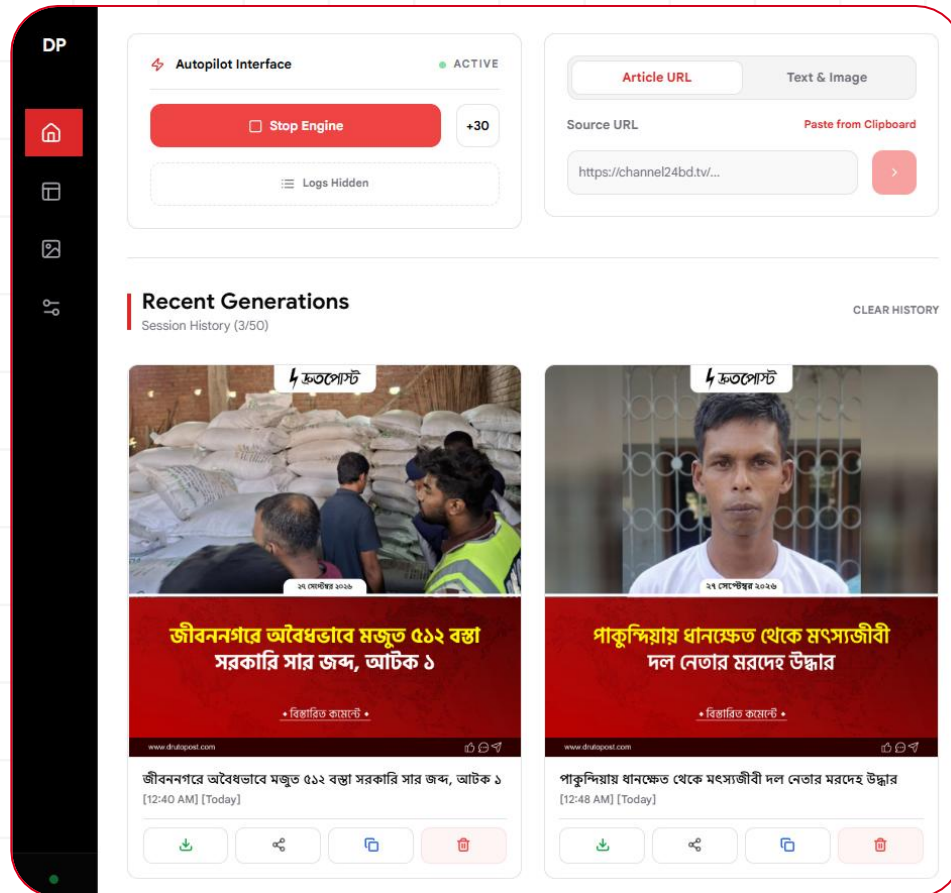

photocard design & generation time

ONE TIME INVESTMENT, LIFELONG SAVINGS

Most newsrooms recover their setup costs within 4–6 Months (Based on typical setup scope final pricing depends on your requirements)

OUTPUT

The team sees a finished social asset – not a design task.

Less production work. More publishing throughput.

WHY DRUTOPOST

Five reasons newsrooms choose to automate with us

Publish Up to 90% Faster

Turn breaking news into a ready photocard in seconds, not minute

100% Consistent Branding

Every photocard follows your template – no off-brand surprises

Less Manual Work, Fewer Errors

Free your team from repetitive design and moderation tasks

Scales With Your Newsroom

Handle 10 a day or 1,000 – the pipeline doesn't slowdown

Built-In Content Safeguards

Automated headline moderation reduces the risk of sensitive posts going live
